

Deep Down

We live down deep under the sea
Where there are many wonders to see.
We live down deep under the sea
Where we are always eager to be.

Just look at the sights
A million delights
Deep down, deep down
Deep down under the sea.

There are fish of every color
And fish who couldn't be duller;
There are eels with electric power;
And worms that hide and cower;

All kinds of sea things;
Giants and wee things,
Living on the bottom of the sea.

We live down deep under the sea
Where there are many wonders to see.
We live down deep under the sea
Where we are always eager to be.

Just look at the view
An under sea zoo
Deep down, deep down
Deep down under the sea.

Deep down under the sea.
